Experience

Frontend Developer

Acencore | Jul 2024 – Nov 2024

- Enhanced the company's main website using **Next.js** and various cutting-edge frontend technologies, focusing on smooth animations.
- Developed an AI-driven **Video-component** for conducting interviews, improving the efficiency and accuracy of the interview process.
- Created a comprehensive component for listing job candidates, utilizing **Chart.js** and various UI libraries to present data effectively.

Frontend Developer

StakeHub Infotech | May 2024 - June 2024

- Successfully developed and integrated new components using **Next.js**, enhancing the functionality of the application.
- Led the migration of the entire **Tailwind CSS** codebase to **SCSS**, significantly enhancing maintainability and scalability.
- Contributed and Configured several UI enhancement changes to the codebase

Junior Software Developer

PhysioPlus Healthcare Pvt Ltd | Sept 2023 - Dec 2023

- Orchestrated the end-to-end development of the company's main platform, showcasing full web development lifecycle.
- Played a pivotal role in managing the project lifecycle at the **Frontend** side, demonstrating high responsibility in timelines, and client expectations.

Web Developer

Devyut | Part-time

- Contributed to the development of user-centric web applications for diverse clients, showcasing strong frontend skills
- Initiated and led a comprehensive 7-day tutoring program for freshmen & Sophomores, on web development with hands-on Project Development

Projects

Homingdotcom – A Real Estate WebApp

A real estate buying and renting Platform, facilitating user connection, property listing, and diverse exploration

- Designed and developed a Full-Stack comprehensive real estate website using **React.js**, **Prisma**, **Node.js**, **Express**, **MongoDB**, **SCSS**, **Tailwind** and **Cloudinary**.
- Enhanced user engagement by enabling browsing, saving, and posting real estate listings, integrating detailed property pages with images, maps, and location information for a seamless user experience.

Dimple – A social media WebApp

A social media application, facilitating user connection, content sharing, and diverse exploration

- Built a full-stack application using **React**, **TanStack Query**, **Tailwind**, **Appwrite**, **ShadCn UI**, implementing features like user authentication, profile creation, content sharing, and an embedded Spotify-like music player.
- Improved user experience with functionalities such as saving and liking posts, infinite scrolling, and exploring various posts, ensuring responsive design and robustness.

Vibezz – Mood Tracking & Memes

A Mood Tracker that Shows Memes related to your Mood

- Developed a mood tracking application using **Next.js** and **Tailwind**, allowing users to monitor their moods on a calendar.
- Implemented a meme feed feature using the Reddit API displaying memes based on the selected mood.
